

Thrift Store Expansion Project

Contractors and Businesses

We have started our work on our Thrift Store expansion project, so 2024 will be a year of growth where it has long been needed. Our Thrift Store continues to be our largest income creator and has been a cornerstone of our ministry for many years. This much-needed expansion will give us more space for shopping displays, as well as furniture donations. Kim continues to coordinate with contractors and businesses that have already committed to donating their services to this project, but we are still in need in several specific areas to bring this project to completion. **There is a unique opportunity for a Legacy Sponsor (\$100k) for the expansion project. The Legacy Sponsor(s) would have a customized, prominent sign at the entrance of the Nana's House Thrift Store with the name of their business or family name.** The sponsorship money will cover the costs of items that are not usually donated (i.e., permits, licenses, etc...). The sponsorship could be used to cover time-sensitive purchases that have not been donated, in order to keep the project moving forward toward completion. Please pray that this project moves ahead as seamlessly as possible.

We are thankful for the following contractors and businesses that have already committed to donating their time and resources – **MH Williams Construction, CAG Architect, MBV Engineering, ACE Blue Prints, Sheepdog Concrete, Eau Gallie Electric, Adams Engineering, FSM Engineering, FBM Materials, Express Roll Off Dumpsters, Steve John Fritzon Carpentry Inc, Omega Garage Doors, C&C Landworks, J & T Insulation, Four C's Nursery, Bruener Hagen Inc. Surveyors, Florida Breeze and River Rocks Restaurant.**
